A focused approach to surgical distribution

Dear Patient,

Your provider has prescribed CPM therapy (continuous passive motion) for your post-op care. CPM involves the use of a mechanical device which automatically moves the knee joint with the goal of initiating early motion following surgery. The device itself supports the limb and slowly moves the joint without patient assistance. Research has demonstrated that the use of a CPM machine will lead to an earlier return of motion and a decrease in post-operative pain.

Focus Surgical Inc. will pursue reimbursement from your insurance company and if you have coverage you may have a copay or deductible which will be clarified when you receive your EOB (explanation of benefits) from your insurance company. However, many insurance policies do not have coverage for CPM. We will collect a deposit of \$375 which will be used to settle your bill and any unused portion will be refunded to you upon the return of the machine and EOB review. Please call our billing manager at the number below if you have questions or concerns when you receive your EOB. Your bill from Focus Surgical will arrive shortly after the EOB is received.

We ask that the machine be returned to Stanford as soon as you are finished with it. You will be charged for the replacement cost of the machine if it is not returned to us within a reasonable amount of time after you complete care.

Carol Wishnask - (314) 426-7778-ext. 101 Billing Manager

Credit Card Information

We ask that you provide your credit card information before or at the time of service if you are interested in receiving CPM. The deposit will be placed on your card and any refund due will be paid to you after your copay and/or deductible amount is finalized and the machine is returned.

We look forward to being of service.
