

BREG COLD THERAPY and COMPRESSION (PACKAGE 1)

Your provider recommends cold therapy and/or compression as valuable adjuncts following injury, surgery, and post-operative rehabilitation. Early utilization reduces pain, swelling, bruising and can minimize the amount of oral pain medication needed after your surgery. **STANFORD HEALTHCARE** offers two cold therapy choices to assist you in your post-operative and rehabilitation phases of healing.

Insurance companies classify Cold Therapy and Compression units as non-covered items. If you consent to purchase either unit, payment will be collected at the time the unit is ordered, at the price indicated, and your insurance will not be billed. You may use your FSA and HSA funds for this purchase.

To purchase a unit, please contact Kim Blanco at 650.544.1092. For more information on Breg Cold Therapy and Compression, please visit Breg's website at <https://www.breg.com/products/cold-therapy/>.
